

## ENVIRONMENTAL POLICY

RMP conducts its operations in an ecological manner in accordance with relevant legislative requirements and associated standards.

We are committed to the ongoing protection of the environment and prevention of pollution by maintaining stringent control measures by:

- monitoring and assessing possible hazards and pollutants in air, soil and water
- avoiding damage to flora, fauna, cultural and heritage listed properties
- engaging NATA accredited laboratories for chemical analysis of soil, water and waste samples
- classification and appropriate disposal of generated waste by a licenced waste disposal company
- being environmentally responsible and conscious to climate change
- monitoring and measuring our carbon emission levels and their impact to our operational activities and the environment.

RMP meets legal, regulatory and environmental requirements by maintaining certifications/accreditations/ licences to:

- Environmental Management System ISO 14001:2015
- Painting Contractor Certification Program – PCCP – Classes 3, 4, 5A, 5B (Full) and 6 (Full)
- Environment Protection Authority Licence for the Transport of Trackable Waste.

RMP's focus on continual improvement is achieved by:

- establishing, monitoring, communicating, and reviewing company environmental objectives
- reviewing environmental legislation, regulations and other relevant material and implementing measures to ensure compliance
- identifying and controlling environmental risks, hazards, and impacts
- promoting environmental awareness to all levels of the company and providing employees with appropriate training
- striving to continually improve our environmental performance through review, research and development, and consultation with interested parties
- Being aware our interested parties can have requirements related to climate change.

RMP is proud of the environmentally conscious approach applied to its operations and we continuously look to improve this through innovative and environmentally friendly equipment and techniques.

Raymond W Ellis  
Managing Director
